Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Science 290:347-350(2000).
-!- FUNCTION: Provides the D-alanine required for cell wall biosynthesis (By similarity).
-!- CATALYTIC ACTIVITY: L-alanine = D-alanine.
-!- COFACTOR: Pyridoxal phosphate (By similarity).
-!- PATHWAY: D-alanine branch of peptidoglycan biosynthesis; first
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Andersson S.G.E., Zomorodipour A., Andersson J.O., Sicheritz-Ponten T., Alsmark U.C.M., Podowski R.M., Naeslund A.K., Eriksson A.-S., Winkler H.H., Kurland C.G.; "The genome sequence of Rickettsia prowazekii and the origin of

Todomain swapping creates a third putative combining site in bovine
odorant binding protein dimer.;
Nat. Struct. Biol. 3:863-867(1996).
-!- FUNCTION: THIS PROTEIN BINDS A WIDE VARIETY OF CHEMICAL ODORANTS.
-!- SUBUNIT: Homodimer.
-!- SIMILARITY: Belongs to the lipocalin family.

gnl|CDD|17208, pfam02777, sodfe_C, Iron/manganese superoxide dismutases, C-terminal domain. superoxide dismutases (SODs) catalyse the conversion of superoxide radicals to molecular oxygen. Three evolutionarily distinct families of SODs are known, of which the Mn/Fe-binding family is one. In humans, there is a cytoplasmic Cu/Zn SOD, and a mitochondrial Mn/Fe SOD. C-terminal domain is a mixed alpha/beta fold.

CD-Length = 111 residues, 100.0% aligned Score = 181 bits (460), Expect = 7e-47
